23 January 2018

Dear Mr Bonelli, Dear Committee members,

I am pleased to acknowledge the kind gift of EUR 2,000, received on 23 December 2017, representing a voluntary contribution toward our conservation work to help save the snow leopard.

WWF has been working for years to conserve snow leopards – supporting scientific studies, sustainable community development projects, and efforts to end poaching. But with snow leopard numbers at an all-time low, we are scaling up our activities.

Habitat loss, poaching and increasing conflict with communities have seen the world's snow leopard population reduce drastically. And climate change is now putting the future of their mountain home at even greater risk. But WWF is working to address these threats. And with your help we can make a real difference and we can bring this magnificent big cat back from the brink of extinction.

WWF relies on the generosity and trust shown to us by concerned individuals such as you and your association, to enable us to maintain our conservation work all around the world.

Your support is so encouraging to us. Please transmit our heartfelt thanks to all your volunteers for this generous contribution and for joining forces with WWF to leave future generations a living planet.

Yours sincerely,

Monika Kull
